WORK EXPERIENCE

Cloud Developer, Expert Level — 6/2023 - Current

Hewlett Packard Enterprise - Remote — *Micro-frontends, React, Typescript, Git, Storybook*

Continuing the work on OpsRamp which has been integrated as a core piece of the HPE Greenlake hybrid cloud product and service line. Continuing to develop features using React, Typescript and a microfrontend architecture.

Senior UI Developer — 3/2020 - 6/2023

Opsramp - Remote — *Micro-frontends, React, Typescript, Docker, Git, Tailwind, Storybook*

Built out new UX-driven screens using React, Typescript and Node

Worked with remote teams from India on the legacy Java-powered pages and worked with API teams to build APIs as needed to replace the legacy portions of the product, integrated the React micro-frontends with the legacy JSP stack.

Mentored and assisted more junior developers on the idiosyncrasies of the complex software and tech stack as we evolve the product transformation

Lead UI/UX Architect — 12/2017 - 1/2020

M Science - Portland, Oregon — *VueJS, AWS, Git, NodeJS, Bootstrap, Element.io, Bulma*

Created the M Data Viz platform, a single page web application that allowed the company's research/analysis teams to share their alternative data and insights with customers in real time.

Worked closely with various teams throughout the company to develop a wide variety of internal/external web-based tools for management of the company's data and highly granular customer access.

Staff Engineer, UI Development — 7/2016 - 12/2017

Aerohive Networks - Portland, Oregon — *Dojo Javascript Framework, Git, NodeJS*

Played a senior level role on the UI team that maintained/created new features for Aerohive's cloud-based wireless network management platform and performed a solo UI/UX role on the company's Big Data team.

Partnered with product and design teams to develop the design and behavior of all new product features.

Lead UI/UX Developer — 10/2011 - 6/2016

Edvisors Network - Las Vegas, Nevada — *Angular, jQuery, PHP, Kohana, MySQL, SVN*

Redesigned the company's network of 30+ sites into modern responsive layouts, with a focus on conversion rate optimization and SEO. Worked with product teams to design new features and enhance existing features across sites.

Worked with the engineering team to migrate website code from flat php files to Kohana framework and Expression Engine CMS, to .NET and Sitecore.

Owner/Designer/Developer — 9/2004 - 10/2011

Sites by Joe, LLC - Cape May, New Jersey — *jQuery, PHP, Codeigniter, MySQL, SVN*

Managed hundreds of web design projects from start to finish and handled the client feedback loop while delivering projects on time successfully.

Developed several real estate specific web products (MLS/IDX/RETS data integrations, rental management software, real estate CMS software).
